## WHO IS SENSIBLE?

### PREEMINENT GLOBAL SURROGACY CONSULTANCY

Since 2012, SENSIBLE has been a leading surrogacy consultancy, assisting intended parents in conceiving their families through surrogacy options worldwide.

Our reputation for excellence is built on a commitment to client service, personal attention and reliability.

Not all intended parents have the same priorities or resources -- which is why Sensible offers multiple surrogacy options worldwide. But regardless of destination, all our programs share the same culture of service and dependability.

SENSIBLE is an American agency, following U.S. protocols in medical care and customer service. Our surrogate candidates receive the same medical, legal and psychological vetting as our U.S. surrogates.

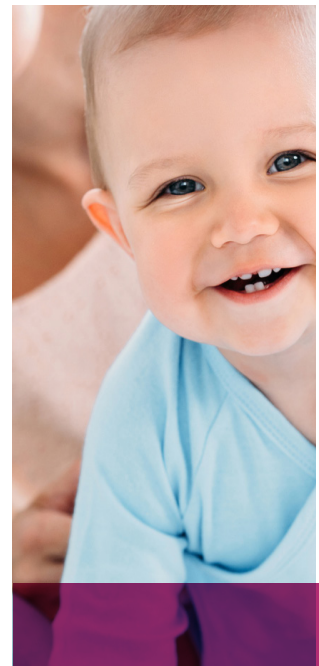

All SENSIBLE programs are in jurisdictions with secure legal frameworks. Mexico joined a short list of countries supporting surrogacy in 2021 when its Supreme Court ruled in favor of surrogacy for all individuals.

---

**SENSIBLE now offers American-style surrogacy programs using affordable facilities in Mexico.**

As a SENSIBLE intended parent, you'll get thorough oversight of your journey, a personal coordinator to accompany you on every step, plus an available resource to address your concerns 24/7.

We'd love to meet you in person! Contact us; chat with our team; and become part of our family. We promise, this will be one of the most meaningful, and beautiful

# LEGAL FRAMEWORK

## MEXICO SURROGACY

**In 2021, the Supreme Court of Mexico upheld commercial surrogacy for all individuals regardless of marital status, sexual orientation or gender identity.**

The Supreme Court decision overturned the prohibition against surrogacy by individual states. The new framework came in an overwhelming majority decision of the Court.

The decision has three important parts:

### 1. Surrogacy is a protected medical procedure

The court found that the right to form a family (and the right of a child to its family heritage) is a fundamental Human Right. To pursue this right, medical techniques of IVF and gestational surrogacy must be available without discrimination.

### 2. Intended Parents are the rightful parents

The court found that the a child's parentage is determined by the desire to form a family, not on genetics or circumstances of biology. A legal Surrogacy Contract demonstrates that it's the intended parents who have this "procreational will", and so children born through these agreements are always the legal offspring of the intended parents.

### 3. Surrogacy must be universally accessible

The Court found that all adults, without any limitation due to race, nationality, religion, marital status or sexual orientation have the right to marry and to conceive a family. Surrogacy in Mexico must be universally available,
